Familiar: Mocha, Chai, Enzyme, Webpack, Babel, Heroku

PROJECTS

Chess – *Personal Project – Sole Developer – https://jh-chess.herokuapp.com*
- Developed a real-time multiplayer chess application that features a game lobby, user authentication, highlighting of valid move paths, and drag-and-drop.
- Technologies used include React, Redux, Express, PostgreSQL, Sequelize, Socket.io, React DnD.

7 Wonders – *Capstone Project, three weeks – Team of 4 – www.sevenwondersgame.com*
- Led the development of game architecture and multiplayer functionality using Firebase and Cloud Firestore.
- Built the game lobby, game table with dynamic player seating, player hand display, and play action functions.
- Collaborated with teammates to pair program in an Agile development environment.

Memorabilia Shop – *Group Project, one week – Team of 2 – https://memorabilia-shop.herokuapp.com*
- Created an e-commerce site featuring categorized products, administrator functionality for adding and editing products, and a shopping cart for both guests and logged in users.
- Personal contributions included product list displays, the administrator feature, and the shopping cart.

Jello – *Hackathon, four days – Sole Developer – https://jello-stackathon.herokuapp.com*
- Developed a collaborative project management app loosely based on Trello. Users can create list boards, assign users to boards, create lists and list items, and drag items between lists.
